## GRADUATION

A student can apply for graduation once all the studies belonging to the Master's degree have been completed. The Application for a Degree Certificate must be submitted to the School by the given deadline. The student has to make sure all credits (including thesis and maturity exam) have been accepted and registered into the Oodi system by the given deadline (approx. 15 workdays before the intended graduation day). Please note that the results of the evaluation are given within 30 days of the exam or of the date the work has been submitted for evaluation.

The student can pick up the degree certificate on graduation day from 12 am to 13 pm from Education Services in Fabriikki (F427, 4<sup>th</sup> floor). The degree certificate can also be sent by post as a registered letter.

**NB!** In exceptional situations certificates are sent by post!

\* In June, the University of Vaasa organizes a graduation event Publiikki for that month's Master's degree graduates. The graduates receive their degree certificates during this graduation ceremony.
