

CoDoc Vaasa

COLLABORATIVE DOCTORAL PARTNERSHIP MODEL

CoDoc Vaasa is a collaborative doctoral partnership model that matches organisations and doctoral researchers with scientific research in a field or topic of common interest. The partnership model creates added value to all parties as it covers issues such as joint funding, scheduling, mentoring and supervision.

New knowledge and competitiveness

The CoDoc Vaasa partnership model allows doctoral researchers to tackle real-world issues related to sustainable business, energy and society utilising support, resources and data of external partner organisations with common interests. Research projects are based on the partners specific needs, providing new knowledge for improving competitiveness and creating solutions for the future.

Bringing together the right parties

The CoDoc Vaasa partnership model brings together ambitious and innovative doctoral researchers with relevant partner organisations, offering opportunities to influence research topics, gain early access to results and link own R&D with validated independent scientific research. It also builds connections with doctoral-level expertise with future employment prospects in mind.
